

Engineering Services and Staffing

Work Force Network, Inc. is the industry expert in facilitating engineering placements and services in every discipline, providing internal engineering integration, and placing top-tier engineers, all possessing the skill-sets required by our customers. Whether the need is experience with specific machinery, controls, software, and/or programming, Work Force Network specializes in sourcing and employing engineers with finite qualifications that fit perfectly into the job functions necessary for optimal performance within our customers' facilities. Employing an on-staff Controls Engineer, Quality Engineer, and a former Quality Control Auditor, Work Force Network's Staffing Division is industry-trained allowing them to find and qualify engineers well-versed in all disciplines; Controls, Manufacturing, Quality, Mechanical, Mechatronics, Integration, Estimation, Project Management.

Work Force Network's Staffing Division can provide on-staff contracted engineers, source outside engineers for contract assignments on specific projects, provide temp-to-hire engineers, or staff permanent placement positions in a direct hire capacity. Work Force Network's Staffing Division provides the top talent in the industry because our recruiters are equipped with the experience, knowledge, and resources to locate high-end candidates that only those with industry experience can access.

Work Force Network recruiters and engineering specialists have their ears on-the-pulse of the industry, allowing them to locate, screen, and qualify engineers well-versed in the most modern and cutting edge software tools including: UG NX, Catia, Delmia, VB.Net, Scada, HMI, PLC programming languages, and engineers with ample factory automation experience (cradle to grave engineers, debuggers, conveyor engineers, quality engineers, robotic engineers,

electrical engineers). Work Force Network's experience in qualifying and validating the necessary skill-sets required allows Work Force Network to supply only the most qualified engineering candidates to enhance the workplace operations of our customers.

Many staffing companies simply search resumes for key words using resources like CareerBuilder and Monster.com. Few have the real world experience to understand the qualifications necessary for specific engineering needs. This is vital when finding candidates that are best suited for the operations that Work Force Network's customers are conducting, taking into account the optimal skill-set on specific software, machinery, and controls, work ethic, and personality cohesiveness with WFN's company culture to ensure that our placements excel to their full potential in a work environment that is tailored to their abilities and personalities. Using both traditional and nontraditional methods to source qualified candidates, our network of engineering and manufacturing contacts, compiled over years of manufacturing experience by WFN executives and recruiters alike, allows the Work Force Staffing Division to find talented engineers that do not post resumes on the aforementioned sites or respond to the traditional recruiting posting destinations. This gives Work Force Network's recruiting team an added and vital resource that other staffing companies simply don't have access to. For the best in engineering services Work Force Network, Inc. is the established expert in the field.

Work Force Network, Inc., Your Total Workplace Solution

Some of Work Force Network's Engineering Staffing placements:

- Controls Engineers
- Mechanical Engineers
- Electrical Engineers
- Mechatronics Engineers
- Quality Engineers
- Autocad/Catia/UG NX Designers
- Robotics Technicians/Engineers
- Software Engineers
- Industrial Engineers

There are no recruiters better suited to provide engineering personnel services than actual engineers. Work Force Network's Staffing Division utilizes the knowledge of our on-staff engineers and operational experts to parse through resumes and dig deep into the resumes of individuals with a true understanding of their skill-sets and qualifications needed to perform the required job functions. Each applicant is tested to ensure that they are capable of performing the duties listed on their resumes. Work Force Network utilizes the specific software testing programs that employers are looking for; RSLogix 5000 testing, Siemens PLC Step 7 testing, and any other customer defined and/or required validation tests. Work Force Network is able to confirm an employee's skill-set and ability more proficiently than other companies who use only traditional screening resources. Having this software available also allows us to work with entry-level candidates from a variety of schools, to provide hands-on, jobsite training to the engineers and integrators of the future.

Work Force Network's recruiting team and staff engineers excel in their ability to ensure that only qualified engineering applicants are presented to our customers. This is a service that can only be provided by experienced industry professionals who possess wide-ranging networks and know how to properly interview, test, and validate potential candidates. These factors and qualities make The Work Force Network Staffing Division second to none in providing world class engineering placements, consistently finding experts to meet our customers' most challenging needs.

Work Force Network's Staffing Other Areas of Expertise

Production Managers and Supervisors

Manufacturing Managers and Supervisors

Software/Programming Professionals

IT Professionals

Electrical and Mechanical Installation and Maintenance

Quality Engineers, Quality Managers,
Supervisors, and Inspectors

Specialized Machine Operators/Programmers
*(prototyping, fabricators, CNC and robotic
operators and programmers)*

Instrumentation Specialists

Material Control Managers
Specializing in LEAN Manufacturing

Purchasing Supervisors and Agents

Accounting/Financial Professionals
(controllers, book keepers, accountants, etc.)

Project Managers *(all fields)*

Project Estimators *(all fields)*
